REASONS FOR ALLOWANCE

1. Applicant's filing of the substitute Oath/Declaration filed 2/8/07 is acknowledged and has been entered.
2. These comments are made in addition to the remarks in Applicant's specification and arguments, concerning the manner in which the invention distinguishes from the art discussed therein. The Examiner notes that the prior art does not disclose or suggest the claimed combination including particularly a coin actuation mechanism having two coin slots spaced angularly from each other, and means for insertion of the first coin including a coin removal and blocking latch as incorporated into the Independent Claim 1 from formally Dependent Claims 2 and 5, now cancelled. The prior art lacks this structure or anything equivalent to it.

Swarzli (US 5,924,542) discloses Applicant's carrier wheel with two coin slots angularly spaced from each other. However, where Applicant calls for a blocking latch set outside the perimeter of the carrier wheel, and associated edge notch and other features as defined as defined in cancelled claims 2 and 5, now incorporated in Independent Claim 1, Swarzli discloses the use of rocker bar (70) with blade (72) which projects into and out of slot (84) as shown in figure 15. This structure is different than Applicants structure and functions in a wholly different manner.

Tsuiki (US 4,350,239) does not disclose Applicant's blocking latch mechanism and does not disclose two angularly spaced coin slots.

The foregoing is an Examiner's Statement of Reasons for Allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
